PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student specializing in Artificial Intelligence, Machine Learning, and Full-Stack Development. Experienced in building scalable AI/ML pipelines, predictive modeling, data preprocessing, and end-to-end web applications using React.js and Node.js. Proficient in Python, Java, and SQL with strong foundations in Data Structures & Algorithms. Seeking an AI/ML or Software Development Internship to apply machine learning, deep learning, and analytical skills to impactful real-world problems.

TECHNICAL SKILLS

Ai/GenAI: Fundamentals of Ai, Generative Ai basics

Programming Languages: Python, Java, JavaScript, SQL

Full-Stack Development: React.js, Node.js, Express.js, REST APIs, MongoDB, HTML5, CSS3

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS)

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

INTERNSHIPS & EXPERIENCE

AI/ML Intern | APSCHE (Government-Sponsored Program) *2026*

Designed and implemented a supervised machine learning model for predictive analytics, applying end-to-end ML pipeline development including data collection, preprocessing, and model evaluation.

- Performed exploratory data analysis (EDA) using Pandas and Matplotlib to extract patterns from structured datasets.
- Applied feature engineering and hyperparameter tuning techniques to optimize model accuracy and performance metrics.
- Gained hands-on experience with Scikit-learn for classification and regression models; evaluated results using precision, recall, and F1-score.

Technology Intern | Green 1M1B (Innovation & Sustainability) *2025*

Leveraged data-driven problem-solving and analytical thinking to address real-world sustainability challenges through collaborative tech projects.

- Applied algorithmic thinking and structured case analysis to develop scalable, innovative solutions in a crossfunctional team environment.

PROJECTS

Hospital Management System | React.js · Node.js · Express.js · MongoDB · REST APIs

- Architected and deployed a full-stack healthcare management platform supporting patient record management, appointment scheduling, and doctor dashboards.
- Integrated RESTful APIs for seamless frontend-backend communication, ensuring data consistency and scalable service architecture.
- Designed a responsive, component-driven UI using React.js to improve user experience and operational efficiency.

Exploratory Data Analysis of Rainfall Patterns in India | Python · Pandas · Matplotlib · Seaborn

- Analyzed multi-year historical rainfall datasets across Indian states using Python-based EDA techniques to uncover seasonal distribution patterns.
- Performed data cleaning, transformation, and statistical visualization to generate actionable insights for agricultural planning and water resource management.
- Presented findings through interactive visual dashboards, demonstrating strong data storytelling and analytical communication skills.

EDUCATION

- Ashoka Women's Engineering College — 2023-2027
  B-Tech in Computer Science & Engineering — percentage:76%
- Sri Krishna junior College — 2021-2023
  AP Board of Intermediate in Mpc — percentage:95%
- VVS rural School — 2021
  AP Board of Secondary Education — percentage:93%

CERTIFICATIONS

- Gen AI Powered Data Analytics Job Simulation – Forage (2026)
- Certified Smart Coder in Data Structures & Algorithms (Bronze) – Smart Interviews (2026)
- Database Management Systems (DBMS) – NPTEL

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Algo University Coding Program: Selected among Top 4,000 out of 20,000+ applicants based on advanced coding and problem-solving performance.
- Smart Interviews: Awarded Certified Smart Coder – Bronze Level in DSA.
- Solved 100+ DSA problems on LeetCode, demonstrating proficiency in algorithms, data structures, and analytical problem-solving.
